You have to see an ad to get something and it won't let you paint the makeup, it just does it for you. And when I try to see an ad to get something I kept saying Please check your connection and try again or I would say currently there is no video available and I would have no choice but to push Ok. Please fix this or bring back the old version. I deleted it The other version was much more fun to play than this version. You can't even paint on makeup, and the game does it for you, which takes most of the fun out of it. Besides, I'm ordered to finish the rest of the makeup, you have to see ads, which I find a little inconsiderate. Every time I tried to see the ads, I'd say, No ad available. She said that for all of them, so I couldn't even finish my makeup. Truly disappointing. As you can see in the title, there was an earlier version. I used to play that with my little sisters and it was fun, but now it's changed and it's not fun, I give 1 star. The previous version could allow you to paint on makeup and all that, even most of my teenage friends played it The Siraj Admani, has not provided details about its privacy practices and data handling to Apple. The developer will need to provide privacy details when submitting their next app update. Calling all fashionistas and beauticians, both and old!
